APPLICANT'S STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

Sir,

As required under 37 C.F.R. §1.133(b), the Applicant submits a Statement of the Substance of the interview of October 14, 2010.

During the Interview, claims 4 and 19 were generally discussed, along with the prior art of record. With respect to Fig. 7, the undersigned provided an explanation of the invention and clarified that the claimed liquid or gel moves through the device and the particles of interest also flow along with the liquid or gel. The Examiner questioned how the liquid phases would maintain their separate lamellae and stated that they believed that the liquid phases would intermix, especially if the fluid would experience turbulence as it exited the entry ports. Additionally, the Examiner questioned how a gel would be moved through the device given that the gel could be viscous substance and may not be inclined to move. The undersigned clarified claim 4 with respect to the electric field being applied perpendicular to the phase boundaries.

The undersigned has contacted the client and will address the Examiner's concerns in a soon to be filed supplemental response.

The Applicant wishes to thank the Examiner for the courtesy of granting an Interview to Applicant's representative.

Respectfully submitted,

HUDAK, SHUNK & FARINE CO. LPA
